Star Building Systems Equestrian Facilities

Millbrook Farm
Spring Valley, OH

A Star building is compatible with any conventional exterior...

Amorous Acres
Rylander, WI

Equestrian facilities vary greatly in design and function. The site, the owner's needs, the horses' needs, and a solid building contractor with a proven reputation are major concerns when planning any facility. For over 75 years now Star has been simplifying those concerns. From stables to clear-span arenas, Star will meet your needs and exceed your expectations.

Star buildings can be customized to fit your needs with a myriad of design features. Recessed spaces in the aisles for water faucets, padded walls, rounded inside corners, outside stall doors, and open grills set into dividing walls between stalls are all key features that a Star building can easily accommodate.

Harris Horse Barn
Coalingo, CA

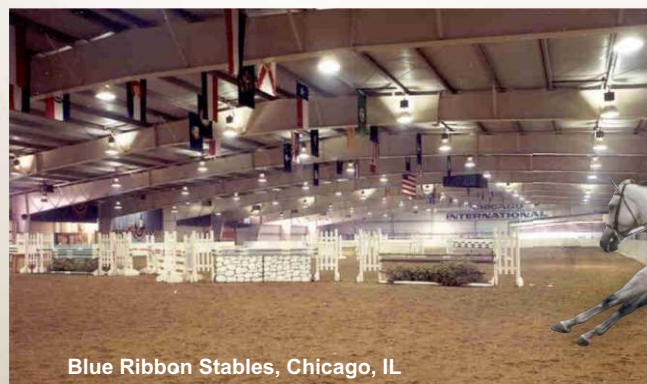

Column-free interiors provide uninterrupted floor space which could be dirt, gravel, asphalt, concrete, brick, or rubber brick that is commonly seen in walking rings or saddling paddocks at racetracks.

OSU Equine Examination Arena, Stillwater, OK

Gorski Farm Building, Wausau, WI

Blue Ribbon Stables, Chicago, IL

Star's design approach allows high ceilings that help promote proper ventilation to clear the air of dust and mold in bedding, hay and feed. Cupolas and dormers can be added to open the facility up to more natural light and help create a stylish grace to the structure. Star buildings also save on upkeep and maintenance because of the quality materials and high standards used in manufacturing.

So, when it comes to designing your new equestrian facility, call a Star Builder. They are your single source of responsibility for site selection, specifications, and interior design to insure a horse-friendly environment. These builders know Star's product, so let them develop a cost-effective plan for you. Call 1-800-654-3921 now for the name and number of a Star Builder near you! Or, visit our web site at www.starbuildings.net to find that builder's name, along with other pertinent information.

...and provides energy efficiency and lower maintenance costs.
